PROFESSIONAL SUMMARY

AWS Cloud Engineer with 1+ year of experience in cloud infrastructure management, server provisioning, monitoring, and security compliance. Hands-on expertise in EC2, S3, IAM, VPC, and CloudWatch. AWS Certified Solutions Architect – Associate with strong Linux administration and automation skills.

TECHNICAL SKILLS

AWS Cloud :

EC2, EBS, EFS, S3, Glacier, VPC, IAM, RDS, CloudWatch, Lambda, Step Functions, Glue, Athena

Linux Administration :

User & Group Management, File Permissions, Process Monitoring, Log Analysis, Package Management, Disk & Storage Management, Basic Networking

DevOps (Basic) :

Docker, Git, CI/CD Concepts, Shell Scripting (Basic)

EXPERIENCE

Applied Cloud Computing (Mar 2025 – Current)

AWS Cloud Engineer | Mindgate Solutions (UPI Infrastructure Project)

Current Project

- Managing UPI production infrastructure on AWS ensuring high availability and system reliability
- Monitoring EC2 instances and application health using CloudWatch alarms and log analysis
- Analyzing transaction logs stored in S3 using AWS Glue and Athena
- Retrieving archived logs from Glacier for audit and compliance requirements
- Troubleshooting network connectivity issues and resolving incidents within SLA
- Implementing resource tagging strategy to improve cost visibility and governance
- Performing disk space management and proactive system maintenance

AWS Cloud Engineer – PFL (Poonawalla Fincorp Project)

Duration: 6 Months

- Provisioned and configured Linux & Windows EC2 instances across Production and UAT environments
- Managed EBS volumes, snapshots, and S3 buckets for secure data storage
- Executed patching activities on Linux and Windows servers in Production and UAT environments
- Resolved VAPT findings by implementing security hardening and IAM policy improvements
- Contributed to cost optimization through proper tagging and periodic resource review

Cloud Support Engineer

Duration: 3 Months

- Monitored cloud infrastructure, alerts, and system health to maintain 99%+ uptime
 - Managed incidents and service requests ensuring timely resolution
 - Prepared infrastructure monitoring reports and maintained server inventory
 - Coordinated with cross-functional teams for issue resolution
 - Performed basic troubleshooting of application and server-level issues
-

CERTIFICATIONS

AWS Certified Solutions Architect Associate

- Certified in AWS architecture, core services, security, and cost optimization
- Skilled in designing scalable, secure, and highly available cloud solutions
- Validate At : [AWS Certified Solutions Architect Associate Certificate](#)

March 2026

AWS Certified Cloud Practitioner

- Certified in foundational AWS concepts, core services, security, and pricing models
- Demonstrates understanding of cloud computing principles and AWS fundamentals
- Validate At : [AWS Cloud Practitioner Certificate](#)

January 2025

PROJECTS

AWS CloudWatch Utilization Automation (Local Model)

- Developed a Python-based automation tool to collect EC2 and RDS utilization metrics from Amazon CloudWatch
- Generated automated Word and Excel reports with graphical insights for infrastructure monitoring
- Implemented IAM least-privilege access for secure AWS API integration
- Reduced manual monitoring efforts through scheduled execution on local systems

Serverless AWS Utilization Reporting System

- Designed and implemented a serverless monitoring solution using AWS Lambda and AWS Step Functions
- Automated EC2 and RDS inventory collection and CloudWatch metrics aggregation
- Generated dynamic Word and Excel reports and stored outputs in Amazon S3
- Built a cost-optimized architecture with an estimated monthly cost of ~\$0.22

EDUCATION

Bachelor’s Of Computer Application (BCA)

(2021-2024)

Tilak Maharashtra Vidyapeeth | Percentage : 67.80% | CGPA : 7.17

Computer Technology (Class XII)

(2019-2021)

Tulsi Technical Institute(VES) | Percentage : 74.50%
